

## Feedback on 'day 2 and day 3'

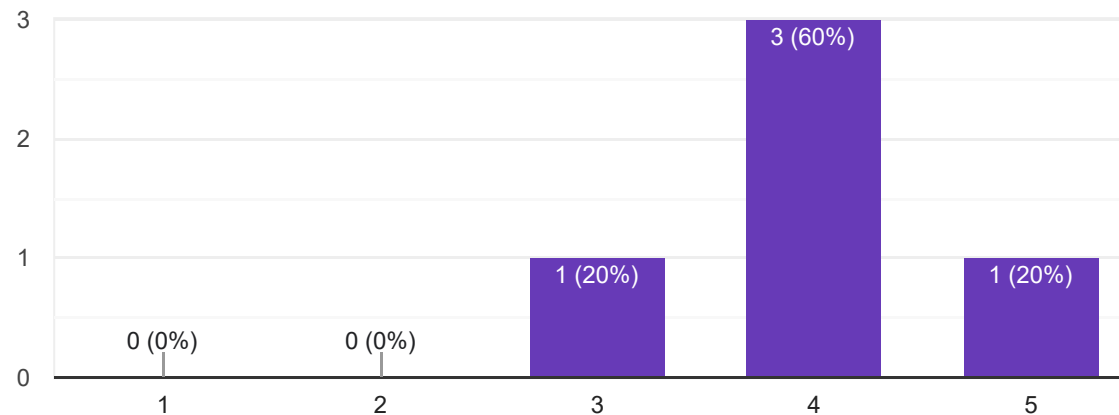

5 responses

[Publish analytics](#)

After the **day 2 (Tuesday)**, on a scale from 1 (impossible) to 5 (easy), how confident are you that you can perform the **tidyR** and primary **ggplot**?

Today's content matched my expectations

If not, can you please detail why it did not match your expectations? If it did match you still

need to type in something, say about that, e.g. "skip", "next",... you choose

Finally, do you have any feedback or suggestions over my contents or lecturing or addressing (days 2 and 3)?

4 responses

the class was interactive, the lecture content was apt and the explanations were structured for easy understanding.

It was a little bit hard to follow what all coding meant and did in the lecture on ggplot advanced

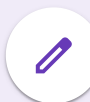

The content was supper good, I wish you can have more advanced classes soon by same instructor

The practical exercises were really good! I think that it was a good amount of time per exercise. The lectures felt a bit long since it is hard to follow a lecture on coding and easy to lose focus when you are reading slides of code. Perhaps you could try to make the lectures a bit more interactive by slowly showing small pieces of code that we can all execute together to get a more hands on feeling on what you are talking about? (not all the time but maybe a few times).

Overall I think the two days were good!
